SUMMARY

Certified web developer with a background in electronics and debug, bringing extensive experience from the automotive and EMS industries. Proficient in troubleshooting and analytical reasoning, with a demonstrated ability to handle complex data analysis tasks. Skilled in generating detailed reports from vast datasets, including datasheets with up to three million lines. With a solid foundation in HTML, CSS, JavaScript, SQL, NodeJS and React, along with a commitment to ongoing growth, I am adaptable and driven to contribute effectively in dynamic work environments.

EXPERIENCE

SEP 2017 - AUG 2022

Laboratory Technician | AB Elektronik GmbH | Werne, NRW, Germany

JUN 2016 - JUL 2017

Laboratory Technician | TT Electronics Sensing and Control | Timisoara, Romania

NOV 2013 - JUN 2016

Debug Technician | Flextronics Romania SRL | Timisoara, Romania

Mechanical and electronic analysis of customer claims. Functional testing for product conformity and validation.

Debug and troubleshooting of both VoIP and TDM phone equipment including PBX interfacing troubleshooting. Troubleshooting on both white box and black box failure levels.

PROJECTS

myFlix (Movie database and web app)

CareerFoundry course project | MERN tech stack application

Server-side and client-side development for a web application. Includes creating a REST API, implementing frameworks, databases, business logic, authentication, data security with the aid of the MERN tech stack.

React Native Mobile Chat App

CareerFoundry course project | React Native

Development of a messaging application for mobile phones to demonstrate my React and React native programming skills. The application provides users with a chat interface and the option to share images and their location.
